What is Management Information Systems?
Management Information Systems (MIS) are the computer-based systems in an organization that handle the daily activity of and provide information to management for planning, organizing, and controlling their organization. MIS can range from a financial application on a personal computer to complex applications using large networks of computers in industries like banking and airlines.

Why Pursue an MIS Degree at Wright State?
- The undergraduate program in MIS was the first in Ohio to be accredited by ABET, Inc. (the Accrediting Board for Engineering and Technology). We were among the first twenty business programs in the U.S. to achieve this accreditation.
- Students gain an understanding of both the business and technical aspects of managing information systems, a skill-set that is high in demand in the region and globally.
- Students develop an understanding of the information needs of business organizations and the role that information systems play in such structures.
